Kansas City, Mo.

OUTSTANDING TOMATOES

SUPER BREAK O'DAY

SUPER BREAK O'DAY—This new Break O'Day must not be confused with the older type, as it has all the good qualities of the old with much more added. The vine has larger stems than the Break O'Day, and the leaflets are much larger and more abundant. The vines stand up better than the Break O'Day and the additional foliage protects the fruit from sun scald. The fruits are globe shaped with no flat sides. Is as large as the Break O'Day with better outside color. The internal structure is very solid and meaty, and is a much darker red color than the older type. Ten to fifteen tons of fruit per acre is not an unusual yield for this variety. The crop matures about the same time as the old Break O'Day, which is about 68 days from setting plants in the field. It is most desirable as field stake or for greenhouse growing.

PURPLE KING (100 Days)

PURPLE KING (100 days)—A second-early, smooth, pink-fruited variety. It is very similar to Globe. Fruits are globe-shaped, high-crowned, medium sized, and perfectly smooth; very solid and meaty, and has a thick skin. They set in clusters of from 5 to 7. Vines make a good growth and have rather heavy-cut foliage. Unsurpassed by any other shipping variety. Should be staked. Vines long, somewhat resistant to wilt.

BO-KAY (100 Days)

BO-KAY (100 days)—We are sincere in our belief that this tomato is an outstanding main crop variety. It is wilt-resistant, and trials show it to be almost free from check or cracks. It is a very heavy cropper, and is large and smooth with dark red color inside and out. Its strong heavy foliage makes it a valuable variety for planting on light soil. Also good for greenhouse forcing and staked or field growing. Two years of trials have been most satisfactory.

MARGLOBE CERTIFIED

MARGLOBE CERTIFIED—This tomato is 100 days, has been greatly improved since its introduction by individual plant selection, so that it is nearly perfect. It is globular in shape, very little depression at the stem end, has few seed and does not crack easily. The vines are robust and as wilt resistant as any variety we have ever seen, color rich red. Don't confuse this with ordinary Marglobe as it is different.

NEW PINK BEAUTY (100 Days)

NEW PINK BEAUTY—This variety is undoubtedly the best of all pink or purple tomatoes. Globe shape when small, slightly flattened and very large when matured, large coarse vines to protect the fruit from sun scald. You owe it to yourself to try it if in the market for a pink tomato.

NAME	ADDRESS

To Our Friends and Customers

FOR MANY YEARS the bulk of our business has been with the market gardeners, supplying them with the best the market affords. We are constantly on the alert for new and better varieties. We have been fortunate in getting to our trade some of the outstanding varieties of today and you can rest assured that we will continue to be on our toes as to your needs.

We pride ourselves in quick service. The sun never sets on an order that gets in early enough to be gotten out the same day. We have been doing this for years.

Important Ordering Suggestions

**By Carefully Following These Suggestions Many Mistakes May Be Avoided
AND BETTER SERVICE CAN BE GIVEN**

Free Transportation

All seeds quoted herein are shipped anywhere in the United States proper by Parcel Post, Express or Freight, our option, all **transportation and packing charges paid by us excepting Peas, Beans and Corn** which we cannot ship paid beyond the 4th Parcel Post zone unless accompanied with other seed.

Large bulk orders which may include Peas, Beans and Corn will be shipped to your nearest express or freight office, transportation paid. **C. O. D. and money order return fees** are not considered as transportation charges and therefore, must be paid for by the customer.

Terms of Sale

While our regular terms are cash with order we are pleased to offer open account to gardeners of established credit or who can furnish us with satisfactory business references; at least three established

business concerns that have extended credit to you or who know you through past business dealings. (Names of friends, neighbors, relatives, etc., are not sufficient to establish credit relations.)

How to Make Remittances

Remittances may be made at our risk by any of the following methods: (1st and best) Post Office Order; (2nd) Bank Draft or check; (3rd) Express Company Money Or-

der; (4th) Registered Letter. Cash or stamps are sent at purchaser's risk; however, the Postal Department asks us to discourage the use of stamps.

Order Blank and Envelope

An order blank and envelope are inclosed for your convenience. We suggest you print your name and address. If you wish to reorder and have no order blank send it to us

on plain paper. It will receive the same prompt consideration. Additional order blanks will gladly be sent on request.

Shipping Instructions

When goods are to be shipped by Freight or Express, give plain shipping directions; otherwise we use

our best judgment in routing. Goods on which we pay transportation are shipped at our option.

Large Orders

Institutions, Gardeners or Florists wishing larger quantities than quoted are requested to send in

list for quotation which will be returned promptly with lowest possible prices.

SPECIAL NOTICE—Andrews-Burri Seed Co. gives no warranty, express or implied, as to description, quality, productiveness or any other matter of seeds (Bulbs or Plants) it sells and will not be responsible for the crop. All sales subject to loss or damage by fire or other contingencies beyond our control.

YELLOW RESISTANT STRAINS OF CABBAGE

In the years immediately following 1900, crop failures became more and more frequent in the cabbage growing sections of the middle West. Even on land where the crop had been grown only a relatively few times, growers were puzzled by the fact that the plants turned Yellow, leaves dropped off at the stem and plants died in large numbers. This occurred even when careful rotation of cabbage with other crops was practiced. Once this diseased condition appeared there seemed to be no effective cure or prevention by rotation, seed or soil treatment, and the only course left to pursue was to abandon such fields as "Cabbage sick." The varieties described below have proven their real worth in districts where it has been impossible to grow cabbage of the more common varieties in the past few years.

YELLOW RESISTANT EARLY GOLDEN ACRE, absolutely a new variety, which has been bred out of the Golden Acre, but has been entirely satisfactory in the last two years in many parts of the country. We have found it to be as early as the early strains of Copenhagen and yet as resistant as any of the other varieties of cabbage, which are bred with a thought of producing a crop on infested soils.

Our stock is limited on this variety and we would suggest that you place your orders early.

WISCONSIN ALL SEASONS—94 Days—A yellow-resistant strain of All Seasons. Valuable in sections which are infested with cabbage yellows or wilt. Coarser plants than the original All Seasons. A good Winter keeper, producing large, flat, deep hard heads.

MARION MARKET OR NEW RESISTANT WISCONSIN COPENHAGEN—90 Days—This is a yellow-resistant strain of Copenhagen Market. Plants large, coarse, not so uniform or early by ten days as the original Copenhagen, but have solid, crisp, tender, round heads. Will produce a crop when non-resistant strains fail.

YELLOW RESISTANT BUGNER'S SHORT STEM, extremely popular wherever planted, our strain of seed is a production of the originators stock seed. This variety produces large, semi-round heads. It is disease resistant and will take trifle more space to grow than other varieties, should not be set closer than 2½ by 3 feet.

WISCONSIN No. 8, a yellow resistant strain of the Danish Ballhead, desirable for growing in sections infected with this disease. Plants are somewhat larger, more leafy and spreading than the Ballhead, but heads are fully as firm, compact and long keeping.

DANISH BALLHEAD SHORT STEM; (Yellow Resistant) A desirable new strain which produces excellent crops on soil infested with cabbage "yellows." Keeps well, is of fine texture, and matures slightly earlier than Wisconsin No. 8.

GLOBE, a yellow resistant type of the well known Glory of Enkhizen, having about the same size head as the Glory. The most popular of all the yellow resistant varieties. We sell more of Globe than all others.

WATERMELON

KANSAS KING—This is truly the king of all the watermelons with which we are acquainted. When its wonderful qualities are analyzed, the vote is usually 100 per cent. Foremost, it is large, often ranging 60 pounds; it is early. One grower from Minnesota reports a sale of 82 deliciously ripe melons averaging 28 pounds each, 79 days from planting, and we have yet to receive a report of a melon with a hollow center from any of the growers, whether large or small. It is oval or round in shape; distinctly striped; rich, red flesh, unexcelled in sweetness with tan colored seeds.

BILL ROGERS—This melon, since it was introduced by us three years ago, has met with sales but a little short of a revelation to our growers, as its fine qualities have enthused every watermelon lover who has become acquainted with its sugary, juicy, rich flavor. It is a smooth, round, oval-shaped melon with dark rind, and often weighing 50 pounds. Its tough rind makes a very desirable shipping melon. It is a few days earlier than the Stone Mountain, has a vigorous vine and is a heavy yielder; free from hollow center when ripe, seeds are white.

4th OF JULY — The earliest melon of which we are acquainted, as the following description will

show. It is seemingly of Russian origin and first offered to American growers by the Minnesota State Experiment Station. We make no claims for its development or origin.

A watermelon that ripens as early as nine or ten weeks from planting—that is remarkably sweet and high in quality—that possesses great market appeal—is among the newer introductions by the Minnesota Experiment Station.

MOUNTAIN HOOSIER — One of the new varieties of Stone Mountain type, only darker rind, red meat and more uniform. Not so rough. White seed, 35 to 60 pounds. Good shipper and lots of merit.

OKLAHOMA CHIEF or FLORIDA GIANT—One of the largest round oval-shaped, dark rind melon introduced in years. It has very dark skin with thin tough rind, and black seed. Bright red meat, very large. Good shipper. You are going to see lots of this melon as it is going places.

BLUE BOY or BLUE WATSON—Truly a new variety the growers have been looking for. Good size, fine quality. Blue-black color, blunt end. Growing up to 30 inches long and weighing 60 pounds. Melons are common tan seed, red meat and a good shipper.

WATERMELON DISEASES

Wilt and Anthracnose are the two most serious diseases of the watermelon. Wilt is a disease that makes its appearance any time from the seedling stage until the plant is matured. The whole plant may suddenly wilt and die, or one runner may remain healthy.

Anthracnose, or Small Pox, is a disease caused by spotting of the leaves and fruit. This disease can be controlled by spraying the foliage as soon as any signs of leaf spots appear on the leaves near the crowns of the plants, with 3-3-50 Bordeaux mixture spray.

Wilt-resistant varieties, as the name indicates, are those resistant to the wilt disease. The wilt producing organism lives in the soil for many years, so the only method of control is the use of resistant varieties of which we have two outstanding varieties, State Fair and Step and Fetchit. We have sold these melons in the hottest

wilt land of Southern Missouri, Oklahoma, Mississippi and Indiana with the best results.

STATE FAIR—This is a wilt resistant Stone Mountain, round in shape, having the same color rind as its parent, and bred for resistance to wilt, a common disease in so many sections the past two or three years. The flesh is deep red, firm and solid of heart; an unusually early solid melon, many attain a weight of 40 pounds; fine for roadside and store trade. Lb., \$1.25; 5 lbs., \$5.00; 10 lbs., \$8.50.

STEP and FETCHIT — Thin wilt-resistant melon is better quality than Kleckley's Sweet. Long dark green, few necks; good shape, red meat, white seed, medium early. Average weight up to 35 pounds; about 85% wilt-resistant; one of the best varieties for wilt infested soil. Lb., \$1.25; 5 lbs., \$5.00; 10 lbs., \$8.50.

CANTALOUPE

POWDERY MILDEW RESISTANT, 45—88 days. This is the best and only one that we offer. Powdery Mildew Resistant is not its only merit, it can be vine ripened, picked on full slip at which state it carries an attractive yellow

ripe color underneath the closely laced netting. It is about the size of 36 or a trifle smaller. Very uniform, thick flesh, fine quality, long distance shipper. Oz. 20c; $\frac{1}{4}$ lb., 60c; lb., \$1.50.

PEAS

WESTERN GIANT—This truly is a giant podded pea of recent introduction. Its mammoth long, dark, green pods, $5\frac{1}{2}$ to 6 inches long are slightly curved, the vines about 26 inches high, produce a bountiful crop about 73 days from planting. Unlike many varieties of its season, the quality is rich in flavor and will remain tender and sweet several days after picking.

LITTLE MARVEL—62 Days—Vine strong and vigorous, about 18 inches tall. Showy pods about 3 to $3\frac{1}{2}$ inches long with a blunt end containing 7 or 8 Peas. Seed large, green, wrinkled. A very fine productive, dwarf, sturdy variety. Popular with the home gardener and in some sections planted largely by market gardeners.

LAXTON'S PROGRESS—A new variety of great merit and popularity. The pods are large, 4 to $4\frac{1}{4}$ inches long, and of a fine dark green color. Vines grow only 18 to 20 inches high, and bear a heavy crop of handsome pods. Being one of the earliest of the sweet wrinkled sorts, Laxton's Progress is in great demand everywhere. Matures in about 55 to 58 days.

WORLD'S RECORD — 56 Days — Seed wrinkled, large, cream and green color. Pods are pointed, about 4 inches long, and broad. An early type of the celebrated Gradus, very frequently used as an early Gradus. Height of vine 24 to 30 inches, light green. Fine showy single pods, with 7 or 8 Peas in each. Vines medium heavy. A wonderful, early Pea for market and home gardener.

MAMMOTH PODDED EXTRA EARLY—58 Days—One of the earliest and most prolific of all the extra early Peas. It has given good results wherever grown. The vines reach a height of about 30 inches. They are very robust and bear an abundance of pods. The individual pods measure $3\frac{1}{2}$ inches in length and they are well filled with large, rich, green peas of sweet and tasty flavor.

HUNDREDFOLD—This is, without doubt, the very best dwarf pea ever grown. It is the best-flavored and the largest-podded dwarf-growing sort in existence. It is ready about three days after the earliest sorts, and bears an enormous crop of handsome, intensely dark green, fairly broad and pointed pods, 4 inches long, containing about 8 large, dark green peas of excellent quality. The vines are 16 inches high, sturdy, and resist heat well.

THOMAS LAXTON—Days to maturity, 73. A variety having been originated in England by Mr. Thomas Laxton, of Bedford, a noted English horticulturist. This pea is hardy and slightly earlier than Gradus and a more abundant yielder. The pods resemble Gradus in shape, excepting that they are blunt ended. They will attain a length of four and one-quarter inches. They are straight, inclined toward roundness and are well filled. The vines will grow to a height of thirty inches.

CAULIFLOWER

WHITE MOUNTAIN—because of its unusual qualities and resistance has displaced nearly all of the other varieties wherein competition. A strong growing variety of the snowball type, produces larger and deeper heads and with no unusual growing hindrances will make very ample foliage with overlapping leaves over the head as a protection to the snow white heads in its forming. It is short stemmed and is not as “leggy” as many other types, matures with great uniformity and when tied comes on very rapidly and for this reason we advise the planter to transplant in the field in such quantities as

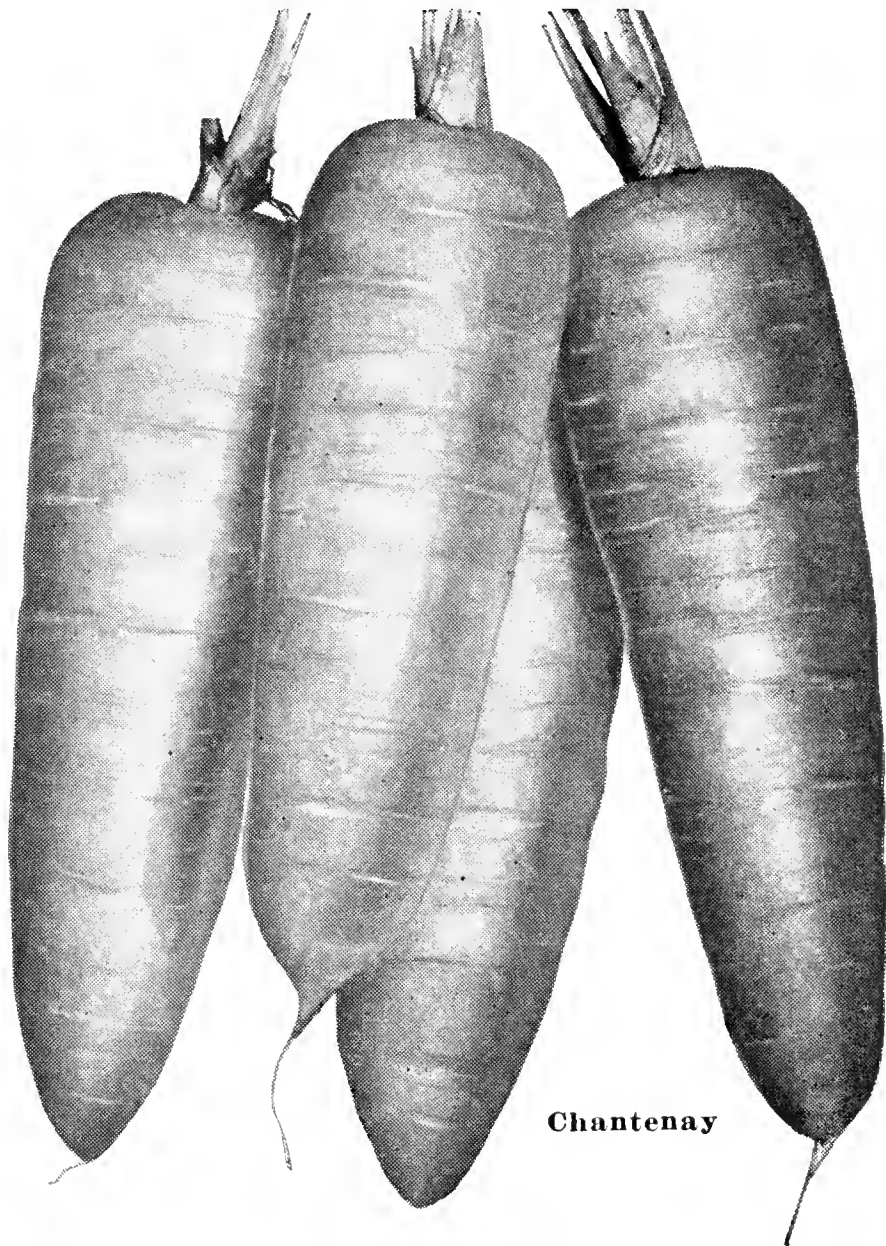

he can handle to the best marketable advantage. Nearly 100 per cent of White Mountain can be harvested within four months after sowing the seed. The white heads are great depth and pure white in color, it is very rare, green leaves appear in the head. Five years’ experience prompts us to say that White Mountain will produce 25 to 30 per cent more number one marketable heads than most other varieties. White Mountain is in a class of its own and our statements are backed by the reports of our customers in Colorado, Michigan, Minnesota, Iowa and Illinois.

GOLDEN CROSS BANTAM — The very sturdy stalks, with broad dark green leaves, are unbelievably uniform. This applies also to the 7½ to 8-inch, 10 to 14-rowed yellow ears which mature all at one time in about 88 days. The tightly wrapped husks resist ear-worms. Will out-yield all others even under adverse conditions. Is 95 per cent immune to Stewart's disease. The most popular Hybrid.

FIRST EARLY—GOLDEN EARLY MARKET — This is the earliest large, golden Sweet Corn, earlier and larger than Golden Sunshine and 2 weeks earlier than Golden Bantam. The large ears are tightly filled with large, sweet kernels of exceptional flavor. This outstanding Corn will bring the best early market prices. The stalks grow 5 to 6 feet high and the ears, 7 to 8 inches long, are 12 to 14-rowed.

CUCUMBER

Our Wonderful

OUR WONDERFUL—Beautiful in appearance, of dark bluish green color. Suitable for both the garden and forcing. A healthy, productive and fairly early variety, the fruits averaging 14 inches in length by 2½ inches in diameter and are very symmetrical. An ideal Cucumber for the market grower and greenhouse man as a "straight pack." Whether you wish to grow it in the open or under glass, rest assured that our seeds are the best money can buy.

WONDER GREEN—10 in. long. A beautifully long, slender, dark green cucumber commanding a premium on the critical market, exceedingly popular because of excellent shape and intense dark color which is

maintained longer than in any other variety. Fruit is inclined to taper, especially at stem end, but is vigorous, productive, resistant to unfavorable growing conditions. Seeds form late in season and are few.

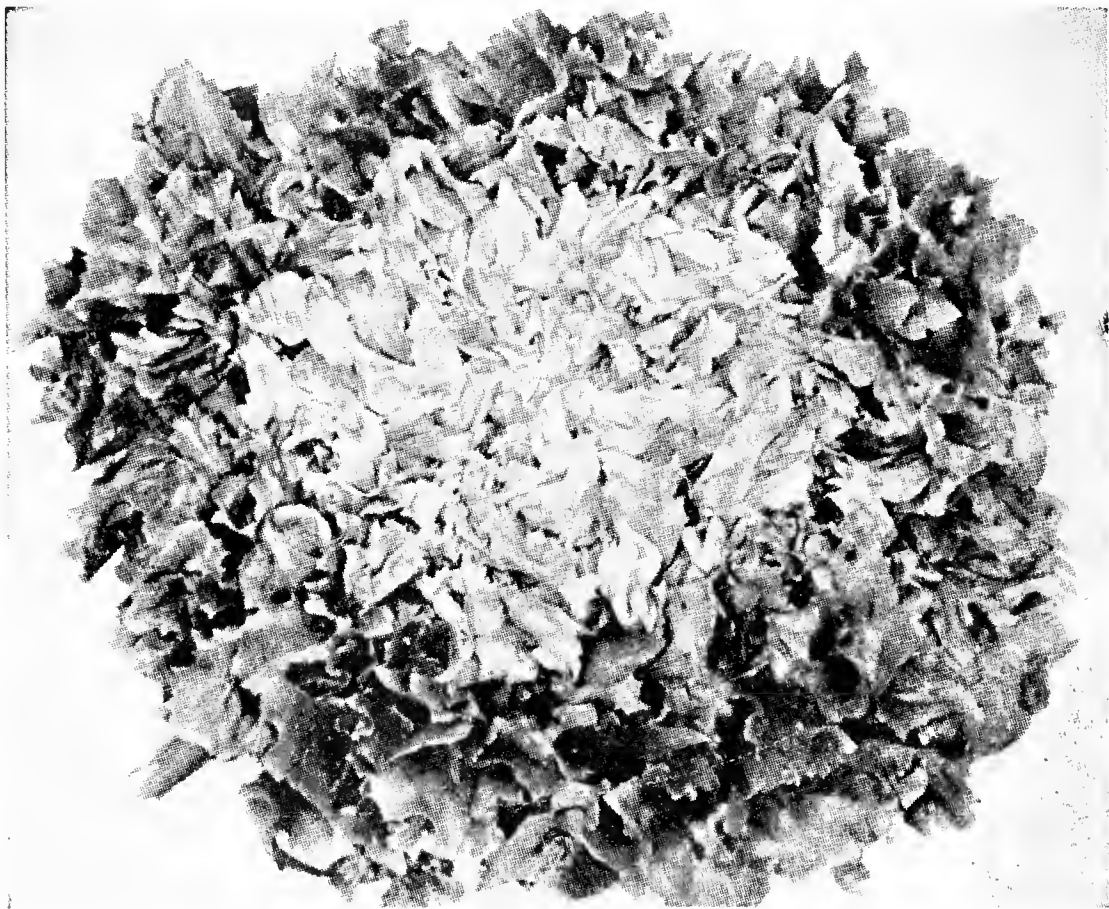

WEST INDIA GHERKIN — The true Gherkin, producing an astonishingly large crop of small, burr-like fruits, 2 or 3 in. in length and about 1½ in. thick. The skin is bright green and thickly set with short knobs.

JAPANESE CLIMBING — Black spine Cucumber of climbing habit. Suitable for covering fences and trellises. Deep green skin when ripe, and mild, white flesh. The fully developed Cucumbers grow 9 in. long and 2½ in. thick.

HEAD LETTUCE

BLACK SEEDED NEW YORK

IMPERIAL No. 847—A new black-seeded strain of New York which may prove to be better than New York No. 12. The large-framed plants have large, rounded medium green heads with abundant wrapper leaves. This strain shows high resistance to brown blight and tip-burn. Specially recommended for summer production, as well as spring and fall. Later than New York No. 12 but stands longer.

NEW YORK No. 12—An even, well-bred early strain which does well right up to July. The plant is large

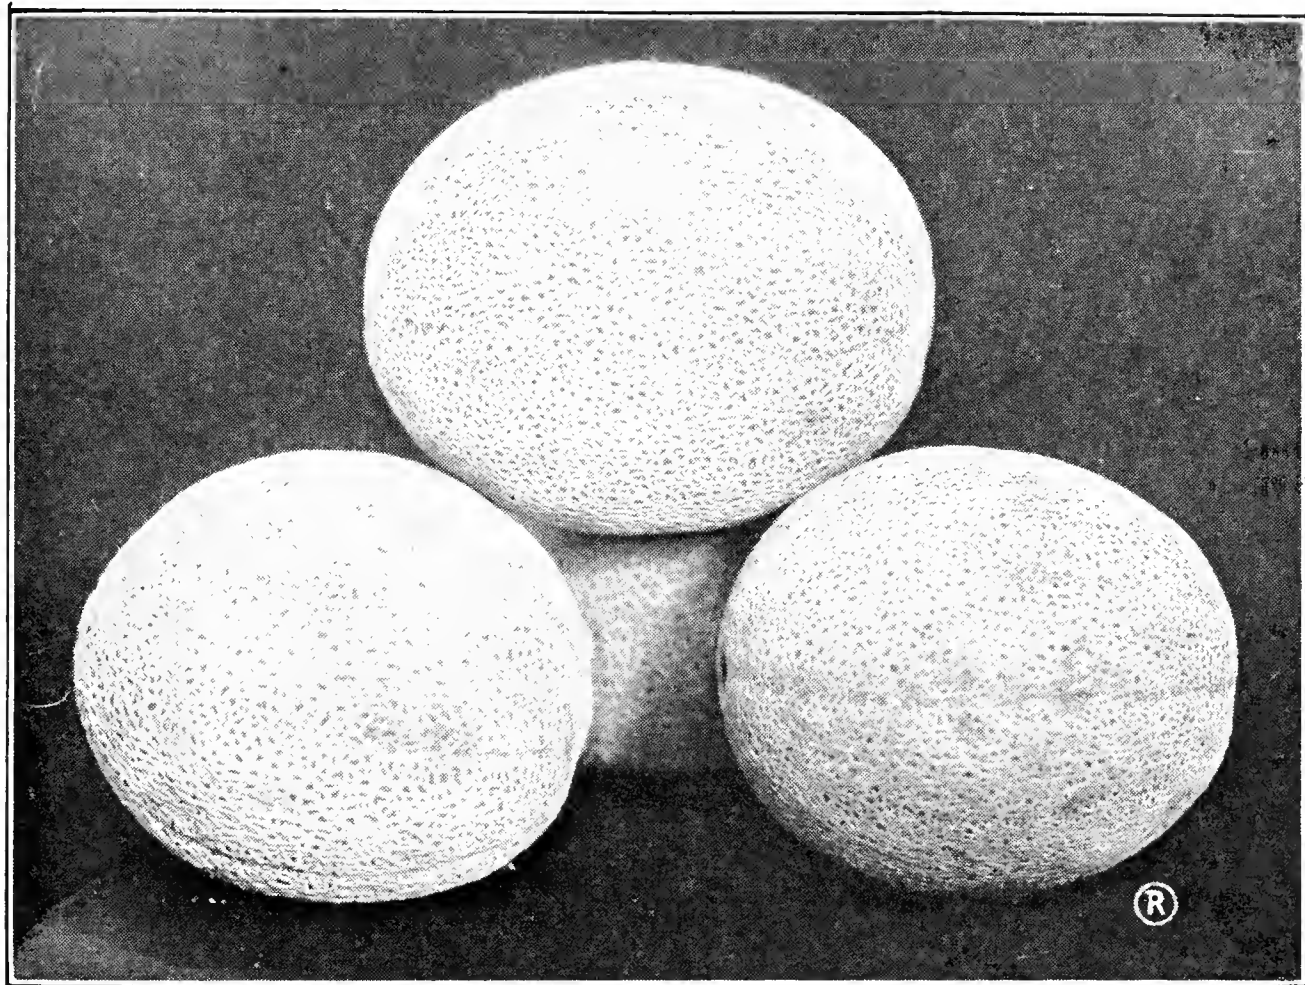

with solid, slightly flattened, Cabbage-like heads, well blanched, crisp and sweet. Its broad outer leaves are crumpled and fairly blistered, notched and slightly curled at the edges. The color is a trifle lighter than the very dark green of other strains. It is very fine for shipping.

NEW YORK No. 515—This is another early maturing strain but its most outstanding feature is its sure heading ability. Each plant makes a big, solid head, slightly darker than No. 12 and rounder. It stands fairly long without bolting.

RADISH

BRIGHT SCARLET GLOBE, SPECIAL GREENHOUSE STOCK (Transplanted Stock)—We have offered a Special Greenhouse Stock of Scarlet Globe Radish a few years ago which has made many friends. Last year we offered an improved stock of this type. In addition to an earlier maturity, this strain is

much improved in color, which is a rich brilliant scarlet, approaching the Saxa color. Its main advantage is the unsurpassed quality. Crisp as no other radish, thin-skinned and much longer standing before becoming pithy. This improved strain is one of our new introductions of "Quality Radishes."

RADISH

SCARLET GLOBE, No. 2, SPECIAL OUTDOOR STRAIN (with more top) (Transplanted Stock)—The past few years we have had an increasing demand, especially from growers of the Norfolk, Va., section, for a Scarlet Globe Radish which will produce somewhat larger tops than our regular Reselected Scarlet Globe. It sometimes occurs that the tops of the latter variety when sown outside remain too short so that they do not bunch well. This demand has prompted us to select a strain with somewhat larger tops and we are glad to be able to offer it to the trade now. This radish differs from our Reselected strain only in the length of tops, as for the rest it is quite as perfect in every respect. It is unsurpassed for outdoors truckers' work.

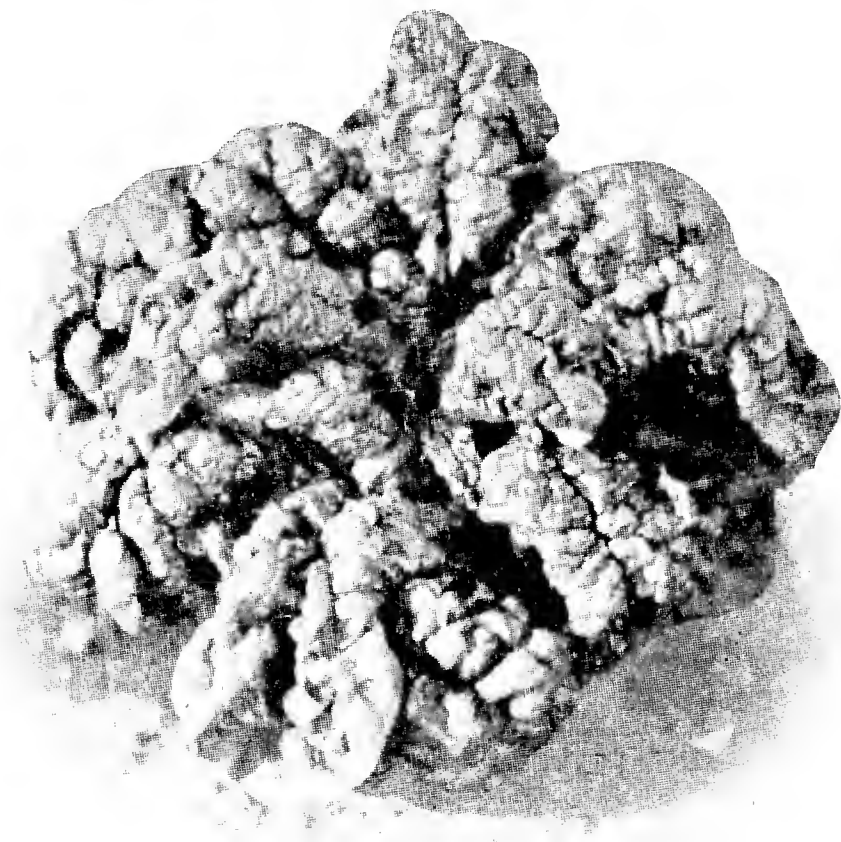

CRIMSON GIANT — A nearly globe-shaped Radish, very large, and remaining in good condition a remarkably long time for a mid-season variety. Skin is fine crim-

son, and flesh pure white and of excellent quality. It matures very quickly and is tender and crisp. A fine sort for open-ground successive sowing.

RESELECTED SCARLET GLOBE, Standard Type, No. 1—Grown from carefully selected transplanted roots. A perfect strain, result of individual plant selection. Surprisingly uniform, color brightest scarlet, shape perfect, well-rounded bottom, with thin tap-root. Tops are of medium size and uniform. Flesh pure white, crisp and of fine flavor. It remains very long in prime condition. Fine for market.

ICICLE MUCK-SOIL STRAIN—This is a very highly selected strain and excels all others we have ever observed. The roots are remarkably uniform and perfectly shaped. The tops in this strain are short and compact but when grown on muck soil they reach just the ideal size for easy bunching and basketing.

Flower Seeds

ASTERS

American Branching—(Also known as Vick's Branching)—We cannot recommend the American Branching type too highly. Very free blooming, producing flowers of the broad-petaled type, slightly incurved and very lasting. Handsome double flowers borne on long stems, a free brancher and unsurpassed in merit. 24 inches tall. Wilt resistant.

Fine—Mixed	Pkt., 10c; ¼ oz., 30c; oz., 1.00

AGERATUM

Blue Perfection—Compact, very large flowered variety. The darkest sort grown from seed ¼ oz., 20c

ALYSSUM—Makes a very pretty border; fine for carpet bedding. Blooms June to November. Sow where wanted to bloom.

Carpet of Snow or Little Gem—Very suitable for border and pot work. 4 inches. Pkt., 10c; ¼ oz., 25c; ½ oz., 40c; oz., 65c

ANTIRRHINUM (Snapdragon)—An exquisite tender perennial, living for a second and third year, but best treated as an annual, blooming in July if sown early and then on until killed by frost. By cutting off most of the flowering stems and giving a slight protection over winter, plants will bloom second summer for four months.

Majus Golden King, 2 ft.....Pkt., 10c; ¼ oz., 45c
 Majus Scarlet Cordinal, 2 ft.....Pkt., 10c; ¼ oz., 45c
 Majus Queen Victoria—White, 2 ft.....Pkt., 10c; ¼ oz., 30c
 Majus Harmony—Terra Cotta Orange, 2 ft.....Pkt., 10c; ¼ oz., 65c
 Majus Rose Queen, 2 ft.Pkt., 10c; ¼ oz., 45c
 Majus Mixed, 2 ft. Red, Rose, Yellow, Scarlet, etc. Pkt., 10c; ¼ oz., 30c

AQUILEGIA (Columbine)—Among the most beautiful and curiously formed of hardy perennial old fashioned flowers. Blooms in the early spring and summer for 60 days. Foliage very attractive. Will thrive almost anywhere, but prefers partial shade and moisture. Splendid for cutting. 2½-3 feet.

Long Spurred Silver QueenPkt., 25c; ⅛ oz., 45c
 Long Spurred Pink ShadesPkt., 25c; ⅛ oz., 45c
 Long Spurred Blue ShadesPkt., 25c; ⅛ oz., 45c
 Imported Varieties—Mixed½ oz., 35c

ACROCLINIUM (Everlasting)—Semi-double, Daisy-like flowers about 1 inch across, with strawy petals of silky appearance; bright yellow centers. 15 inches. White and shades of pink.

.....Pkt., 10c; ¼ oz., 25c; ½ oz., 40c

BALSAM (Lady's Slipper)—A tender annual preferring partial shade. Flowers both single and double, in bright colors and variations are wax-like and very attractive. The individual blossoms floating in a dish of water exhibit beauty to best advantage.

Improve Double Camelia Flowered—In its extraordinary size, perfect form and brilliant colors, this fine strain of balsam surpasses all others. Height 18 inches.....¼ oz., 20c; oz., 60c

Double Bush Flowering (New)—Compact dwarf plant with the blossoms at the ends of the stems so that they are not hidden by the foliage¼ oz., 65c; ½ oz., \$1.15; oz., \$2.00

CALENDULA

Campfire or Sensation—Enormous; brilliant orange with a scarlet sheen and a full yellow center. Our strain of this variety is unusually fine and enjoys a large demand...Pkt., 10c; oz., 45c; ¼ lb., \$1.25; lb., \$4.00

(New) Orange Shaggy—Winner of Gold Medal in "All America" competition in 1935. Fringed and lacinated petals of deep orangeoz., 60c; ¼ lb., \$1.75; lb., \$6.00

Orange King—The best bright orange.....Pkt., 10c; oz., 25c

Lemon Queen—Good clear lemonPkt., 10c; oz., 25c

CAMPANULA or CANTERBURY BELLS—The Canterbury Bells are a large genus of showy plants, blooming in profusion. Easy of culture and certain to flower; succeeds well in good soil. Blooms second year. 2-3 feet.

Calycanthema (Cup-and-Saucer) Mixed—Large cup-shaped bells, surrounded by a calyx resembling a saucer, and giving effect of being doublePkt., 10c; ⅛ oz., 30c

Medium Single Mixed—Large hanging bell-like flowers, in shades of blue, pink and white.....Pkt., 10c; ½ oz., 25c

CANDYTUFT (Annual)—These well-known favorites are among the most beautiful of our annual flowers. The seeds can be sown at all seasons or in Fall for early flowering. They like rich soil and plenty of room to flower freely. Very pretty in masses. Bloom 60 days. 1 foot. Does not transplant readily.

Umbellata Mixed Pkt., 10c; oz., 35c

PERENNIAL CANDYTUFT

Iberis Gibraltarica—Of spreading habit and covered with flat clusters of lilac flowers, shading to white at center. Tops die in winter, but new growth appears early the following season. Excellent for rock gardens or edgings. 8 inches. Blooms second year. Pkt., 10c; $\frac{1}{8}$ oz., 25c

Iberis Sempervirens—Perennial white for rock and open gardens. 8 inches. Blooms second year..... Pkt., 15c; $\frac{1}{8}$ oz., 40c

CENTAUREA—The Centaurea is particularly well adapted for border work, and is also of value for cutting. Sow where wanted to bloom, as seedlings do not transplant readily. Very easy to grow.

Cyanus, Double Blue (Cornflower) Pkt., 10c; $\frac{1}{2}$ oz., 20c

Cyanus, Double Crimson Pkt., 10c; $\frac{1}{2}$ oz., 20c

Imperialis. Mixed (Sweet Sultan)—Larger than usual Centaureas; colors, blue, white, pink and yellow. 18 to 24 in. Pkt., 10c; $\frac{1}{4}$ oz., 20c

Candidissima (Dusty Miller)—Foliage finely cut and of silvery-gray color. For bedding and borders only..... Pkt., 10c; $\frac{1}{8}$ oz., 30c

CYPRESS VINE (Ipomoea quamoclit)—Among the most beautiful of annual running and twining vines, blooming from midsummer until frost.

Quamoclit Mixed—White and crimson. Lilac-like foliage climbing 8 feet..... Pkt., 10c; $\frac{1}{2}$ oz., 20c

COREOPSIS

Lanceolata California Sunbeam—2-3 feet. Single Pkt., 10c

Double Sunburst—Beautiful fully double flowers, 2 inches across. Comes 80% true from seed, and is a welcome change from the single type $\frac{1}{4}$ oz., 35c; $\frac{1}{2}$ oz., 60c

COSMOS

Extra Early Mammoth Mixed Pkt., 10c; $\frac{1}{2}$ oz., 20c

Late Mammoth Mixed Pkt., 10c; $\frac{1}{2}$ oz., 20c

Extra Early Double Crested Mixed. 50% double... Pkt., 10c; $\frac{1}{4}$ oz., 35c

DAHLIA (Seeds Only)

Hybrid Show Double Mixed—An exceptional mixture of really fine seed, saved from prize-winning plants Pkt., 10c; $\frac{1}{8}$ oz., 35c

Finest Single Mixed—Will produce brilliant flowers running through a wide range of striking colors. Fine for cutting. Pkt., 10c; $\frac{1}{4}$ oz., 35c

DIANTHUS

Heddewigi Double Mixed (Japan Pink)—Very showy and fragrant. Flowers 2 to 2½ inches, resembling a carnation, many beautifully striped and mottled. 10 inches Pkt., 10c; $\frac{1}{2}$ oz., 30c

Heddewigi Single Mixed (Japan Pink) Pkt., 10c; $\frac{1}{2}$ oz., 25c

Annual Sweet William (Sweet Wivelsfield)—A very desirable type of single flower (*Dianthus Hybridus*), with a Sweet William-like growth. Flowers, however, are much larger and brighter, and more unusually marked and flaked. Blooms first year. Mixed.... Pkt., 10c; $\frac{1}{4}$ oz., 35c

DAISY, DOUBLE (*Bellis monstrosa*)—The English Daisy is a dainty perennial Springtime plant. Fine for edging or border. Quite hardy in most situations, easy culture, requires shade. Flowers from April to June.

Improved Giant Double PinkPkt., 10c; $\frac{1}{8}$ oz., 60c
 Improved Giant Double RedPkt., 10c; $\frac{1}{8}$ oz., 60c
 Improved Giant Double Snowball.....Pkt., 10c; $\frac{1}{8}$ oz., 45c
 Improved Giant Double Choice Mixed..... $\frac{1}{4}$ oz., 60c; oz., \$2.25

DELPHINIUM—The Delphiniums are showy perennials. Very easy to cultivate and beautiful for borders. The foliage is dark green, much divided, throwing out to perfection the blossoms, which are terminal spikes of blue. Although hardy perennials, the plants will bloom the first Autumn if started early.

Belladonna Improved (Cliveden Beauty)—Clear Blue.

.....Pkt., 10c; $\frac{1}{4}$ oz., 60c; oz., \$2.00

Bellamosum—Dark BluePkt., 10c; $\frac{1}{4}$ oz., 40c; oz., \$1.50

Gold Medal Hybrids, Finest Mixed.....Pkt., 10c; $\frac{1}{4}$ oz., 45c

DIGITALIS (Foxglove)—Hardy perennials of easy culture, living for several years without care and having tall spikes of showy, curious-shaped flowers. Blooms second year. 3 feet.

New Shirley Giant Hybrid Mixed.....Pkt., 10c; $\frac{1}{2}$ oz., 45c

DIDISCUS (Blue Lace Flower)

Coeruleus—Dainty lavender-blue flowers from June to October. Excellent for bedding, and makes a splendid cut-kower. Sow where wanted to bloom.....Pkt., 10c; $\frac{1}{4}$ oz., 35c

ESCHSCHOLTZIA—California PoppyPkt., 10c; oz., 60c

FOUR O'CLOCKPkt., 10c; oz., 25c

GAILLARDIA—MixedPkt., 10c; oz., 40c

- HELIOTROPE**—Old-fashioned fragrant plant. Mixed Pkt., 10c
- HOLLYHOCK**—Single, MixedPkt., 10c; ½ oz., 25c
Double MixedPkt., 10c; ½ oz., 35c
- LANTANA**—MixedPkt., 10c; ½ oz., 35c
- LOBELIA, Crystal Palace (Annual)**—Height 6 in. Plants form compact little bushes covered with brilliant, deep blue flowers throughout the summer. Desirable for edgings, bedding and pot culture.
Cambridge BluePkt., 10c; ⅛ oz., 60c
- LUPINS, Hartwegi (Annual)**—Height 2 ft. Plants are of robust branching habit with deeply cut dark foliage, and tall graceful spikes of pea-shaped flowers in delicate shades of blue, lavender, pink and white. Fine for cutting. If cut as they mature the plants will continue to bloom.....Pkt., 10c oz., 25c
- LARKSPUR, Tall Hyacinth Flowered**—Bloom quickly from seed sown in the spring, and their graceful flower-spikes furnish the finest cut flowers from early summer to frost. They thrive best in a sunny position.
Lilac. Lightoz., \$1.00; ¼ lb., \$2.50
Pingoz., .1.00; ¼ lb., 2.50
Purple or Dark Blueoz., 1.00; ¼ lb., 2.50
Whiteoz., 1.00; ¼ lb., 2.50
Finest Mixedoz., .65; ¼ lb., 1.75
- MARIGOLD**—When all other flowers are past their prime, Marigolds will still furnish a wealth of color. The dwarf varieties are ideal for bedding, while the taller types are valuable for cutting. Marigolds are shallow rooters, and apt to be blown about unless staked. Easy to grow.
(New) Sweet-Scented Yellow Supreme—"All-America" Gold Medal for 1935. Is lemon-yellow counterpart of the famous Guinea Gold, and like it is carnation-flowered and 100% semi-double, but its flowers are even larger. After being in water 48-72 hours, it takes on an even more delightful color, and, if possible, a more graceful form. Deliciously sweet scented..Pkt., 10c; ¼ oz., 25c; oz., 90c; ¼ lb., \$2.00
(New) Gigantea Sunset Giants—A new race with double flowers, 5-7 inches across, in shades of vivid orange, dark and light yellow and primrose. Sweet-scented, too. 35% will come single, but the excellence of the doubles will compensate for this. Long stems for cutting. ¼ oz., 40c; oz., \$1.50; ¼ lb., \$5.00
African Orange Ball—2½ feet ¼ oz., 40c; oz., 1.25
African Lemon Ball—2½ feet ¼ oz., 40c; oz., 1.25

JapanesePkt., 10c; oz., 25c
- MYOSOTIS (Forget-Me-Not)**Pkt., 10c; ¼ oz., 40c

PETUNIAS—For garden or house culture few plants equal the petunia in effectiveness. Beautiful and especially useful for borders, solid beds, window boxes, porch boxes and vases. They commence flowering early and continue a sheet of bloom throughout the whole season until killed by frost; easily cultivated, only requiring a fairly good soil and sunny position.

Giants of California Mixed.—A well balanced mixture containing a remarkably fine variety of colors, in blends of crimson, white, violet, lavender and pink. Large flowers freely produced.

.....Pkt., 25c; 1-16 oz., \$3.00; ½ oz., \$20.00

Elk's Pride—Surpassing Purple Prince in size, is darkest velvety-purple single, and in much demand for modern gardens. Effective in combination with Dainty Lady..Pkt., 25c; 1-16 oz., \$3.50; ½ oz., \$6.00

Balcony Blue—An outstanding variety with large flowers of a beautiful, clear violet-blue color. This is a very popular uniform strain.

.....Pkt., 15c; 1-16 oz., 45c; ½ oz., 80c; oz., \$5.50

Balcony Crimson, Rose, White, or Mixed—Each, Pkt., 15c; 1-16 oz., 30c; ¼ oz., 85c; oz., \$2.85; ¼ lb., \$10.00.

Improved Rosy Morn—An improved strain of the long popular clear pink bedding variety. Of deeper coloring, more compact growth, and freer flowering than the older type, with the same white throat.

.....½ oz., 50c; ½ oz., \$1.50; oz., \$2.50

Rose of Heaven—Rich brilliant rose, with inconspicuous white throat, darker than Rosy Morn.....½ oz., 30c; ½ oz., \$1.25; oz., \$2.00

Howard's Star Improved—Crimson-maroon with a clearly defined star of blushing white.....¼ oz., 50c; ½ oz., 90c; oz., \$1.50

Balcony Petunias—Free-blooming, and trailing in growth, with single flowers 3 inches across. Suited for hanging-baskets and window and porch boxes. Very easily grown. Height 15 inches.

PANSY ENGELMAN GIANT—The world's largest pansy. These fine pansies are offered in sealed packets of ½ oz. or more.

Mixed—Mr. Engelman, one of the foremost British growers, has in this mixture given us a strain of immense size (3-4 inches across) containing a wide range of colors both dark and light. Compact and early flowering. Awarded Banksian Medal at the Great Spring Show at Chelsea, England (1934). Originator's seed. ½ oz., \$2.25; ¼ oz., \$3.75; ½ oz., \$6.50; oz., \$12.00; ¼ lb., \$40.00; ½ lb., \$75.00.

Ruggles Giant ½ oz., \$1.65; ¼ oz., \$2.75; ½ oz., \$4.50; oz., \$8.00; ¼ lb., \$30.00; ½ lb., \$55.00.

PHLOX DRUMMONDII—Dwarf—This type has the large individual blooms of the Grandiflora but the growth of the plant is compact and dwarf attaining a height of 8 inches. Magnificent for parkings and low borders.

Nana Compacta MixedPkt., 10c; ½ oz., 60c

Star Phlox—A dwarf variety bearing star-shaped blossoms in great abundancePkt., 10c; ½ oz., 80c

Perennial Mixed—The bright colored flowers make a pleasing border. Seed is slow in germinating and from fall sowings will often not show until following spring. We don't carry in stock—takes 10 to 12 months to germinate.

PORTULACA (Moss Rose)—Dwarf plants of spreading habit with fleshy stems and leaves, glossy, brilliantly colored, cup shaped, single blooms or rose shaped, double flowers, about 1 inch in diameter. Ideal for rock work or dry sunny locations. Annual.

Double Mixed—Saved from the finest flowers only, and will produce a large percentage of doubles.....Pkt., 10c; ¼ oz., 25c

Single Mixed—Large flowers.....Pkt., 10c; ¼ oz., 25c

PHYSALIS (Chinese Lantern Plant).....½ oz., 50c

POPPIES—Perennial Varieties—Hardy perennials of easy culture; in bright glowing colors.

Oriental—This is the most gorgeous perennial Poppy, flowering in June and July, with enormous blossoms often measuring 5 to 6 inches across, deep crimson, with a conspicuous black blotch on each petal. ransplanting should be done carefully. The best time to lift plants is in August.....Pkt., 10c; ⅛ oz., 20c

Iceland—Although hardy perennials, these dwarf Poppies bloom the first season from seed sown early in spring. Plants are of graceful neat habit with fern-like foliage producing their brilliant fragrant flowers in profusion, and if the seed pods are picked off, continue to flower all season. 1 foot.Pkt., 10c; ⅛ oz., 35c

American Legion—This new single Shirley is a dazzling orange scarlet of enormous size, borne on long, stout stems. The plants are very erect, robust growth.....Pkt., 10c; ¼ oz., 20c; oz., 35c

Double Carnation—Flowered—A magnificent fringed Poppy of dazzling richness and variety of colors....Pkt., 10c; ¼ oz., 15c., oz., 30c

Shirley—Remarkably brilliant and free-flowering. Range from pale rose to deep crimson, delicately edged and fringed. Mixed colors.Pkt., 10c; ¼ oz., 15c; oz., 30c

Tulip—Single bright scarlet tulip-shaped flowers, a black spot appearing at the base of each petal. Hardy annual. Pkt., 10c; ¼ oz., 15c; oz., 40c.

SALVIA or SAGE—A half-ounce should raise 1000 plants. Sow seed in hot-bed or box in house and plant out when ground is warm, or sow outdoors when the Apple is in bloom. In bloom 60 days. Likes full sun. The sage offered by Landreth will produce, when well-grown, 150-200 spikes to the plant. These spikes are often 14 inches long.

Splendens (Scarlet Sage) ¼ oz., 50c; ½ oz., 95c; oz., \$1.75

Bonfire or Clara Bedman—A fine variety, 24 inches high; forms a dense compact bush. Brilliant scarlet ¼ oz., 60c; ½ oz., \$1.10; oz., \$2.00

Farinacea "Blue Bedder"—2 feet. Perennial. Surmounting dense tufts of attractive foliage, rise spikes of light wedgewood-blue flowers. Blooms first year if started early. Flowers may be dried, and used as an everlasting. Is a native Texan. ¼ oz., 75c; ½ oz., \$1.40; oz., \$2.50

SCARLET RUNNER BEANlb., 40c

NASTURTIUM

Scarlet GleamPkt., 10c; oz., 25c

Tall or ClimbingPkt., 10c; oz., 15c; 2 ozs., 25c; 1 lb., 75c

Dwarf Varieties—Finest Mixed..Pkt., 10c; oz., 15c; 2 ozs., 25c; 1 lb., 75c

ZINNIAS—DAHLIA FLOWERED—Large size, fullness of petals, fine color range, good keeping qualities have all contributed to the popularity of this strain. The flowers resemble in appearance the Decorative Dahlia and for this reason it is called the Dahlia Flowered Zinnia. When in full bloom they often measure 5-6 inches in diameter.

Canary Bird—Delicate primroseoz., 60c; ¼ lb., \$1.50; lb., \$5.50
 Crimson Monarch—Bright crimsonoz., 60c; ¼ lb., 1.50; lb., 5.50
 Dream—Deep lavender purpleoz., 60c; ¼ lb., 1.50; lb., 5.50

RHUBARB—NEW ROYAL RUBY

The Rhubarb You Have Been Looking For

NEW ROYAL RUBY is of Canadian origin, a truly red Rhubarb. Red from top of ground to beginning of leaf, cuts red or dark pink throughout leaf stalk. Ruby Rhubarb is not as large as the old type Victoria, but the average length of leaf stalk is 30", width about 1" and 1½" thick.

In every sense of the word, it is positively known that no Rhubarb runs 100 per cent from seed, but from our observation Royal Ruby seed will produce nearly 75 per cent true type. Merely plant the seed in the spring, in fall cut out few green or off types and you have a perfect field for transplanting and your foundation for a crop of perfect rhubarb is built. The extremely hot season of 1934 and 1935 killed many fields of rhubarb necessitating a rebuilding of their fields and why return to old half green variety? Why not give your customers what they want? They want a red Rhubarb. The texture is fine, free from fibre, tender and juicy with an unexcelled flavor. The surface is smooth, medium thick and the flesh is pink to deep red.

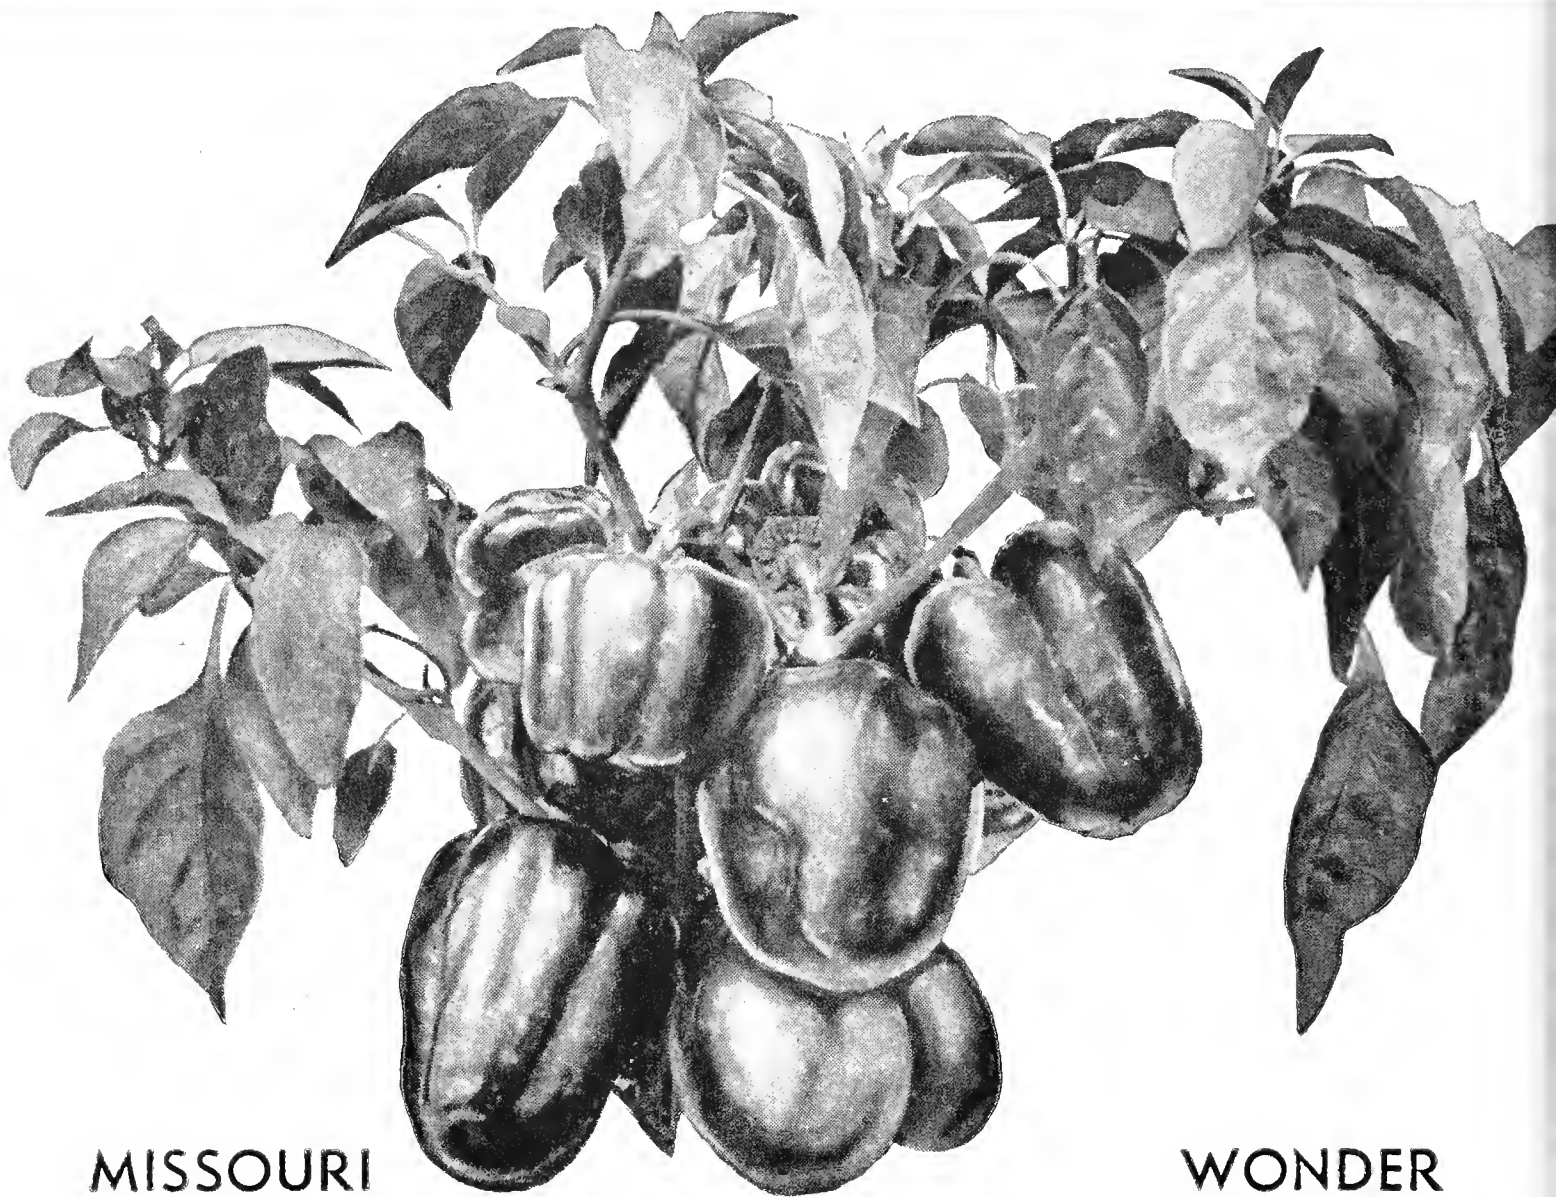

Royal Ruby Rhubarb has grown in popularity every year since we started with it. We are of the same opinion as when we stated—that it is the best of all rhubarbs. We believe that it will in time supplant many of the older varieties as it is much better when cooked. We know that it will bring 10 cents a dozen bunches over any other variety and will be in demand.

One-half Pound at Pound Price	Oz.	¼ Lb.	Lb.
Victoria Giant	20c	60c	\$2.00
Linneus	20c	60c	2.00
Royal Ruby	\$1.00	\$3.50	12.00

Root Prices: Two inch or over at \$10.00 per 100. \$80.00 per 1,000. Will send 25 or over at 100 rate, or 250 or over at 1,000 rate.

Root Prices: One inch and over \$6.00 per 100. \$50.00 per 1,000. Will send 25 or over at 100 rate, or 250 or over at 1,000 rate.

TWO NEW PEPPERS

MISSOURI

WONDER

If you have been having trouble growing an early large pepper, especially where the summers are short, why not try this extremely early, fine shape, large, medium thick pepper? Small bush, mostly four lobe, somewhat resistant to wilt. Oz., \$1.00; $\frac{1}{4}$ lb., \$3.00; 1 lb., \$10.00.

PRIDE OF THE MARKET

Large, thick, heavy fleshed variety of the California Wonder type, being somewhat smaller than the former, but just as uniform. It is twelve days earlier, small bush, somewhat resistant to wilt. This pepper will make you money. Oz., \$1.00; $\frac{1}{4}$ lb., \$3.00; 1 lb., \$10.00.
